The First Waterborne 2-Component Finish Free of Hazard Labelling on the Hardener According to CLP Legislation

Added benefits:
+ 18 hour pot life once mixed
+ EC1 certified!
+ R9/R10/R11 certified!
+ Sweat and saliva certified!
+ Toy certified!
+ FIBA approved for Sport Floors
+ 2K commercial grade top performance

Berger-Seidle®

...wood floors deserve the best!

The First Waterborne 2-Component Finish Free of Hazard Labelling on the Hardener According to CLP Legislation

Simply green – this is the revolution of 2-component wood floor finishing. With the introduction of their innovation AQUASEAL® GREENSTAR in 2016, Berger-Seidle® became the first to offer a **two-component finish system completely free of any hazard labelling** on the hardener. As the product is Isocyanate and Aziridine free, it avoids any H- and P- statements on the label. Wood finishing professionals **no longer have to work with protective measures normally required for products containing isocyanates**. This constitutes a new level and generation of environmental, user, and health protection. In addition, AQUASEAL® GREENSTAR **does not emit any CO₂ gasses** during the reaction as conventional 2-component systems must as a result of their technology.

This new technological innovation from Berger-Seidle® features not only first-class 2-Component performance in a water based finish but also the **highest resistance values, cork approval**, and unmatched user friendliness.

As a top product at Berger-Seidle®, AQUASEAL® GREENSTAR also offers **numerous comprehensive certifications and approvals**. Wood flooring professionals and homeowners are ensured added safety and technical flexibility. The certificates and awards range from **slip resistance class R9-11, sport floor approval** and **kids toy compatibility** to sweat and **saliva resistance** and **EC1 certified**.

The extremely long pot life of AQUASEAL® GREENSTAR offers an additional highlight. While traditional 2-component waterborne finishes have to be used within 2 hours after mixing, AQUASEAL® GREENSTAR offers a **minimum pot life of 18 hours**. When a wood finishing professional mistakenly mixes up too much product in the evening, they can **still use excess product the next morning** making assuring cost savings and bringing environmental waste to a minimum.

The Advantages

- + No hazard labeling
- + Completely without isocyanate or aziridine
- + Requires no isocyanate protection measures
- + No CO₂ gases during reaction
- + Cork floor certified
- + Certified EC1 low emission
- + 2K commercial grade **top performance and resistance**
- + **water based** with **4 gloss levels**: ultramat, mat/satin, semigloss, gloss
- + **Outstanding 18 hours pot life** after mixture, **full cure** of finished floor after **48 hours**
- + **Sweat and saliva certified according** DIN 53160
- + **Skid resistance level R9 certified** acc. DGUV Regel 108-003/BGR 181 and DIN 51130 (**R10/R11 also certified with additive**)
- + **Sports floor certified** according DIN 18032-2 and **FIBA approved equipment**
- + **Toy certified** according DIN EN 71-3
- + **Ideal also for PAK renovation** in combination with AQUASEAL® PAK STOP
